Muhammad Risdyaksa

has successfully completed the online Specialization

Enterprise Data Integration, Governance and Architecture

Data Integration, Data Storage, & Data Migration

Data Privacy, Security, Governance, Risk and Compliance

Enterprise Data Architecture and Operations

The certificate holder has developed advanced, job-ready skills to design and manage enterprise data systems. The certificate holder can implement data warehouses, lakes, ETL workflows, and real-time streaming for efficient data operations. They can utilize business-to-business integration, SOAP & REST APIs, and automated data pipelines. The certificate holder can apply governance, compliance, and risk management best practices to secure enterprise data. They can design and implement enterprise data architectures, incorporating policies, procedures, and best practices for data operations, and system migrations. By completing the labs and projects, the certificate holder demonstrated their skills to design, implement, and secure enterprise data systems.
